# Build and Release Management

16.12.2021
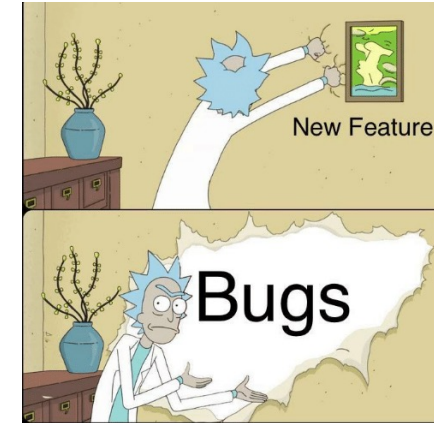

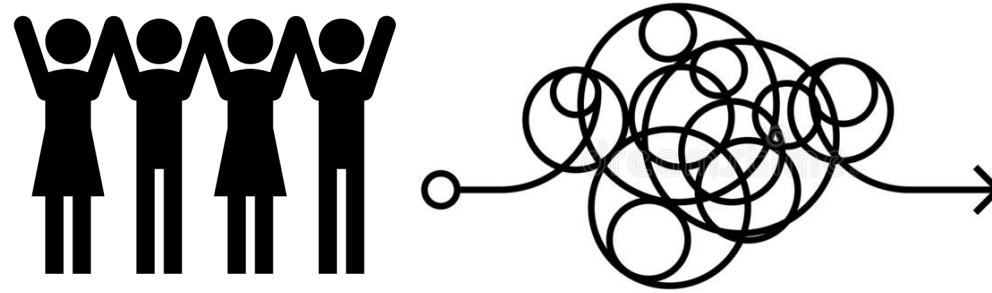

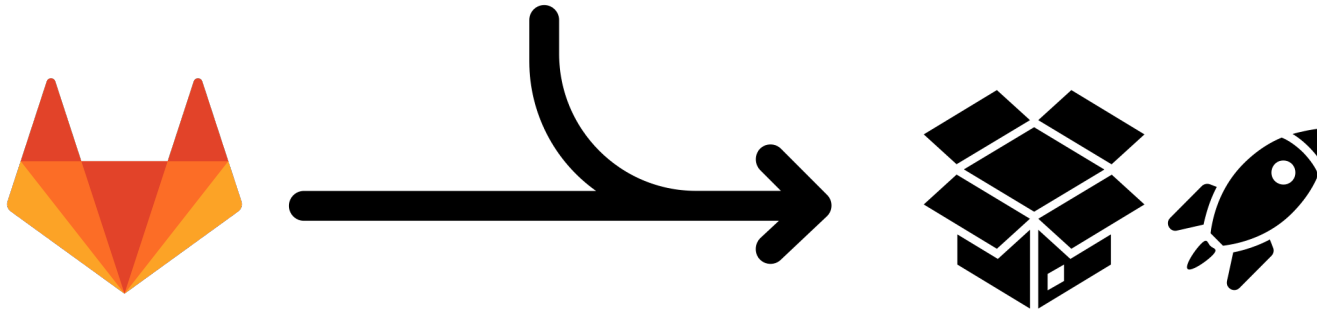

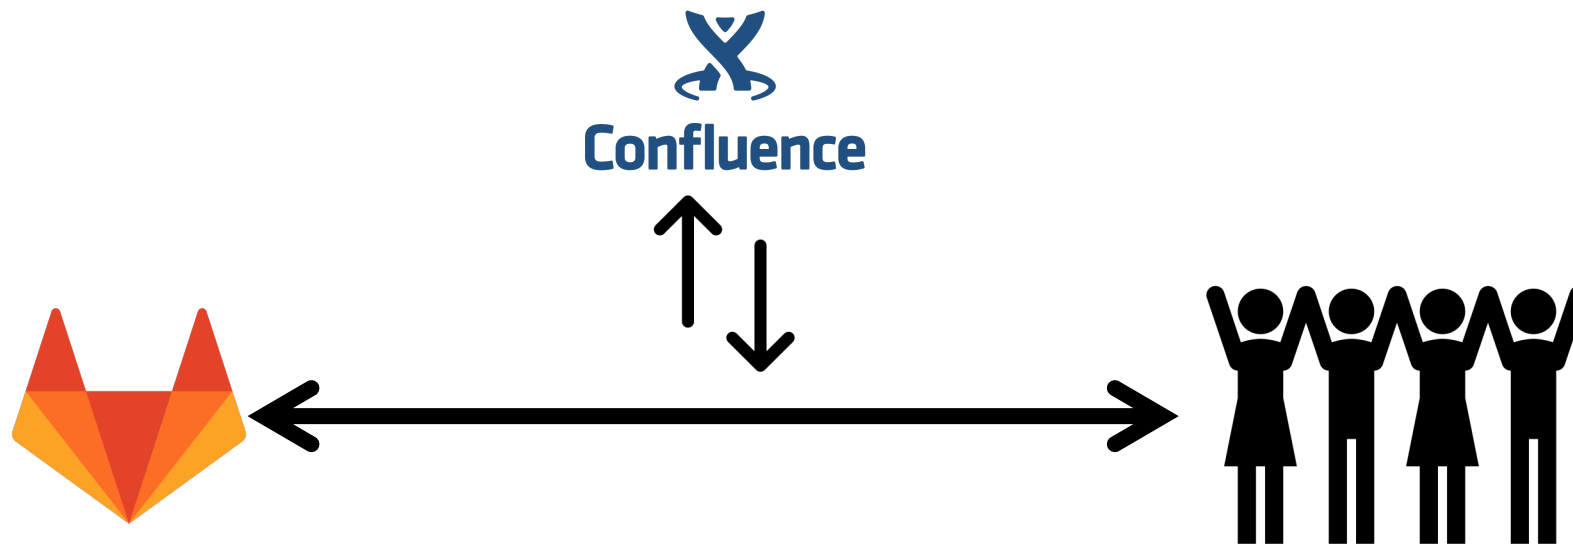

M-Lab 2021/2022

Scope

Why change management is important

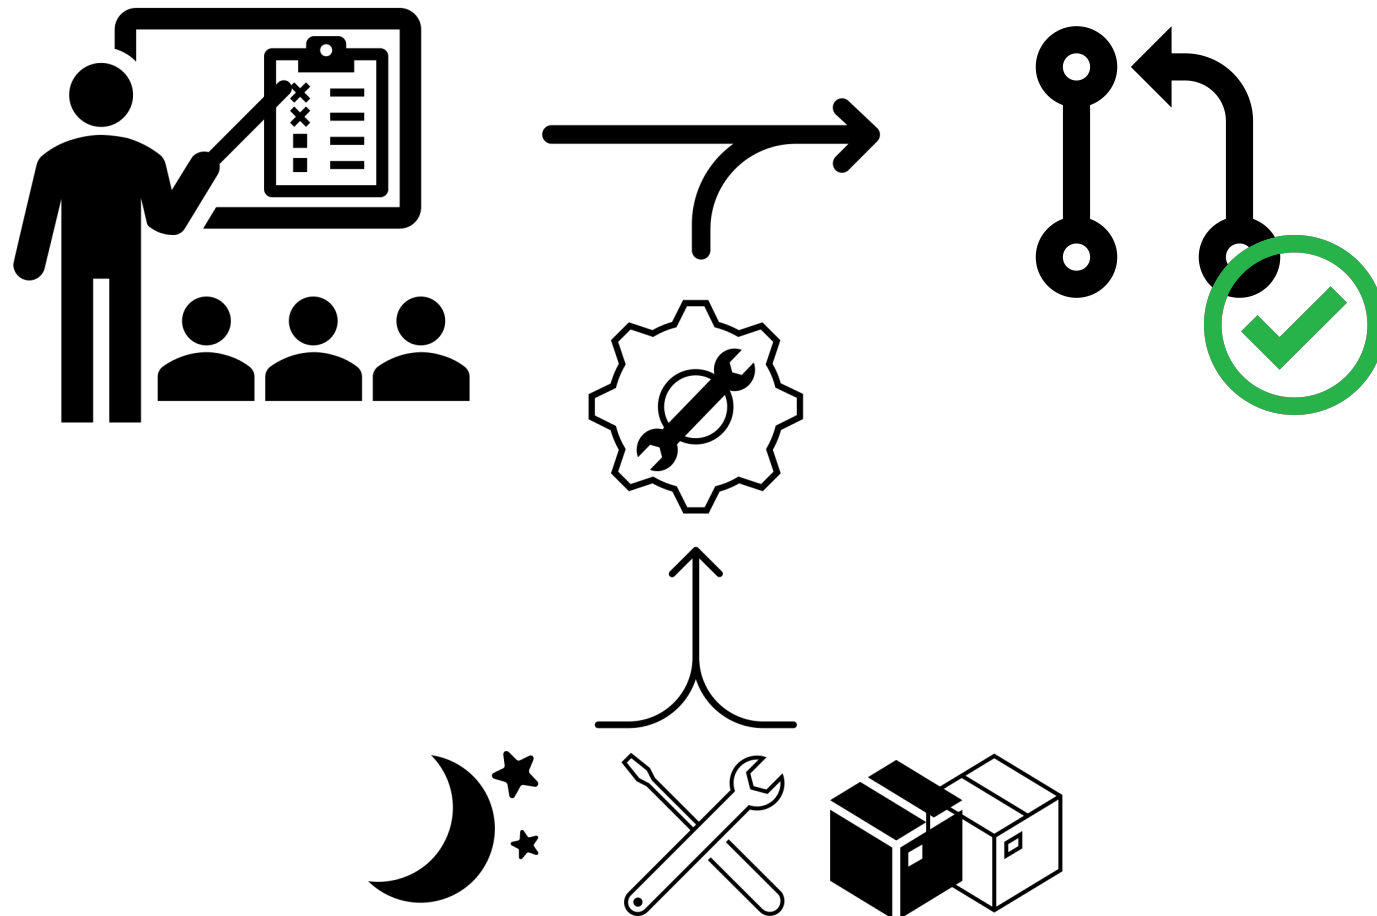

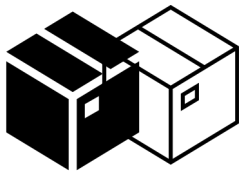

It's not a bug. It's a feature

- labeling our issues
- issue assignment and linking
- protected branches
- milestones

- sprint kickoff meetings
- merge request meetings
- follow-up issues
- commit message conventions

# Why does a project need build management:
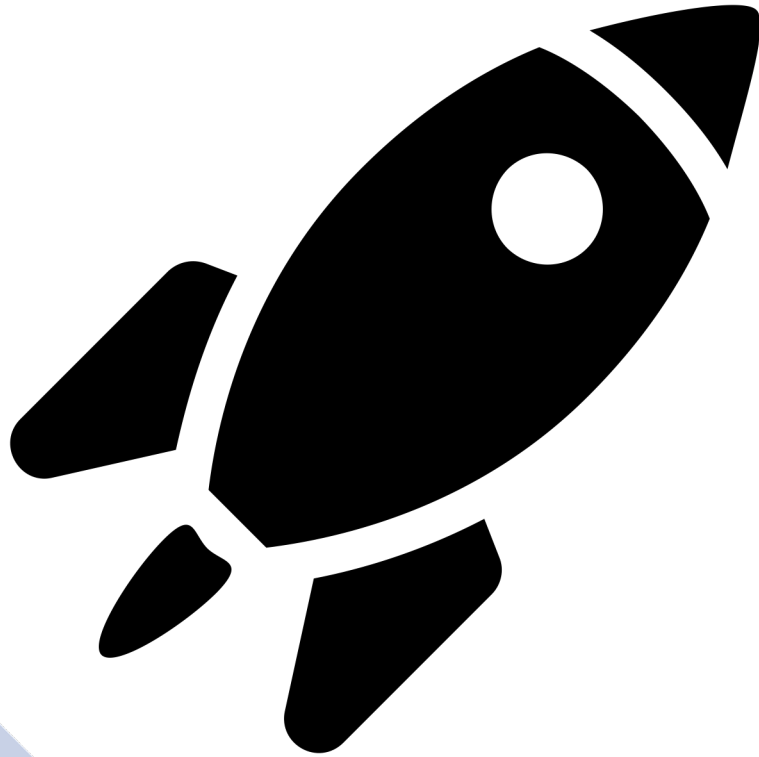

Scope

Continuous Delivery

Continuous Delivery

Lessons learned:

- Right tool for the right job

- Try something new

- Team needs > Tools
